### THERIAN SHIFTER

*Résident dj*

*@ Dream Sequence, web radio*

If it is sometimes hard to put words to feelings, there are some that don't need them because they are so powerful. Therian Shifter has chosen to express his raw emotions as well as his deepest thoughts, anchored in his mind, in music. Through this abstract form of artistic expression based on engineering fundamentals called techno, he offers you a dive into a complex mind that he never stops exploring and experimenting. Head of Ghara Records, he works for this label to create a unique audiovisual universe with a singular concept. Over the years, he has managed to federate professional sound engineers, designers, webmasters and podcasters to give Ghara this multidisciplinary professionalism that makes it a collective of passionate professionals more than a simple label. Therian Shifter can therefore count on an exceptional team thanks to which he can devote himself to the artistic direction and his passion for writing. He is the pen of this label. For each album, he is the one who offers you the written philosophical vision that completes a triptic work: sound, visual, writing. Therian Shifter is an artist with heightened emotions that he abstracts into music. He is a being who does not deny his great sensitivity to impregnate himself with the emotions of others and catalyze them into words.
